

# Ultrasonic Cleaners for Cellular Manufacturing

## Compact Cleaning Systems for Cellular Manufacturing

Bench sizes as small as 33" x 26"

Greco Brothers cleaning systems for cellular manufacturing are the product of over 50 years of custom engineering experience and technical expertise. We include only the highest quality sweep frequency ultrasonic components in systems that are expertly designed with particular attention to durability and ease of use. Our Cellular Cleaning Systems are available in several configurations, all designed to maximize efficiency and minimize floor space. These systems are offered in three configurations, wash-

rinse, wash-rinse-rinse, or wash-rinse-dry. Standard compartment sizes are 10" x 12" x 10" deep and 12" x 16" x 12" deep. Each configuration includes a central control panel, and is available as a mobile cart or as an enclosed bench. Enclosed benches also include an inlet manifold and a drain manifold, simplifying the installation requirements. As always with Greco Brothers systems, custom sizes and configurations are also available and can be quoted upon request.

### Standard Features

- Sweep Frequency Ultrasonics
- All stainless steel construction
- Open Cart or Bench with Removable Front Panels
- Simple on/off control package

### Options

- Manifold plumbing
- Digital Temperature Controller(s)
- Filtration
- Casters
- Custom Configurations
